### **Ultrasound Equipment Donated to Miller Park Zoo**

NORMAL, IL – Ft. Jesse Imaging & Gale Keeran Center for Women has donated an ultrasound unit to Miller Park Zoo. This equipment will be used by zoo staff to better diagnose and treat the zoo animals for a variety of conditions. This is the second time Fort Jesse Imaging has donated a piece of equipment to our local zoo.

The last donation occurred in November 2015. Miller Park Zoo will utilize the new ultrasound to detect pregnancies to help in the husbandry of the mammals at the Zoo. It also gives Zoo Staff and veterinary staff another tool in the toolbox to diagnose and treat any animal medically.

"This new ultrasound is another great asset that Zoo and veterinary staff are excited to utilize to improve the care of our animals," states Jay Tetzloff, Zoo Superintendent.

Ft. Jesse Imaging has partnered with the zoo for many years and loves to support this important community organization. "The way that we can connect with organizations in need is so vital to the work we do at Ft. Jesse Imaging and Gale Keeran Center for Women," said Melissa Jewett, Administrator. "I love being able to help our local zoo continue the work it does every day in preservation, study, and health of the animals in its care."

For more information regarding the donation please reach out to Melissa Jewett, Administrator of Ft. Jesse Imaging & Gale Keeran Center for Women.
